Freshman Computer Science Undergrad | alexander.f.antkowiak@gmail.com | 412-498-0426 | https://github.com/alex1111a

Skills

Languages:	Java, Python
Misc. currently Learning currently:	C • Javascript • html • CSS

Professional Experience

Sales Associate   Bethel Park, PA
Famous Footwear   Aug 2019 - Aug 2021
Chain of retail stores in the United States dealing in branded footwear.
- Operated as part of a team of a few workers who would regularly work in pairs.
  - Communicated with customers about how to navigate the building and find the proper product tailored to their personal needs and expectations.
  - Operated and at times troubleshot our cash registers.
  - Cleaning up any and all messes that may have been left by a customer or putting back the shoes left by said customer.
  - Was regularly asked to unpack shipments of the footwear and stock it onto the shelves.

Projects

Completed:

Pong	Used the Python programming language to create a playable game of pong with an artificial opponent.
Tic Tac Toe	Used the Java programming language to create a playable game of tic tac toe with an artificial opponent.

Ongoing:

Portfolio Website	Using JavaScript, html, and CSS I am trying to make a clean way to display my accomplishments and a few of the games I've made.
The Ignotus Project	Using unity and implementation of c I am trying to create a 2d side scrolling platformer with a hard boss battle.
